

FortifyData conducted a survey of cyber security experts to get their feedback on cyber security and cyber risk management platforms.

75%

of organizations that use a cyber rating product to evaluate their third parties **don't trust the score.**

More than **80%** agreed that a CISO typically oversees cyber security risk management in an organization.

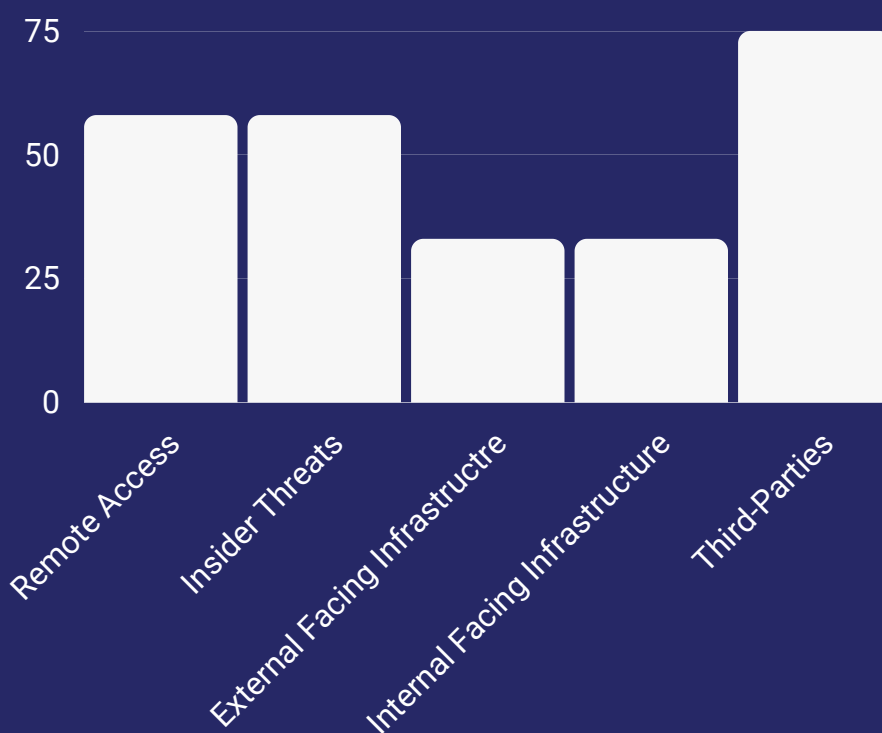

67% believe risk assessments should be conducted continuously.

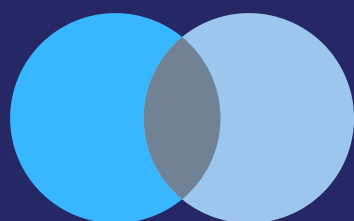

90%

Prefer a risk score to be backed by the NIST RMF (800-37) framework.

BIGGEST CYBER SECURITY CONCERNS

A SOLUTION THAT DOES BOTH

Considering their existing security and processes, **50%** would rather purchase a product that did both self assessment and third party risk management.

A CYBER RISK SCORE RATING SHOULD BE
